

**Michi Okamoto,
Principal**

Dear Parents and Guardians,

Thank you for visiting Combi Plaza International Pre-School website and giving us an opportunity to take you through our offering.

Early childhood is a very important period that builds the foundation of development and influences a social life. Children can be mentally stable by actually feeling that they are loved.

They freely play, explore, and experience various things with stable feelings. In addition, children absorb many things; learn to be confident, learn ways to enrich their minds and thoughtfulness, that helps them grow into wholesome human beings.

At CPIPS, experienced and devoted staff members value each student, look after all students carefully and watch over their development through interesting interactions in a clean and safe facility based on the Japanese high safety standards.

Our curriculums are designed to have a good balance of experiences along with a theme and learning based International Primary Curriculum (IPC). Our 3 main pillars of teaching include moral, environmental and dietary education that are imparted to students by loving teachers in a fun way. As part of dietary education, we provide meals well-balanced in nutrition to enable students to have a good mental and physical balance.

We aim at creating a place where students can shine with individual characteristics, spend time enjoyably, laugh, think, help each other, be conscious of our surroundings and learn to empathise with others.

Communication is important at CPIPS. If we could assist your child in growing to the best of his/her potential, share the joy of his/her growth and achievement of early childhood milestones, we would be honoured and grateful.
